## Directions for Use:

(also on back of package)

1. Pre-fold the trap at the 2 creases
2. Write Date on back of trap
3. Remove wax paper liner slowly
4. Open a white pheromone packet  
(One red pheromone lure per packet)
5. Drop red lure in box labeled  
"PLACE LURE HERE"
6. Assemble into a tent by folding 2  
creases and inserting tab into slot
7. Place trap on shelves or in pantry  
where food moths have been seen.

## Moth Trap Tips

(also on back of package)

- Place traps where moths have been seen, typically food products areas
- Moths go through a breeding cycle. Only mature adult males are drawn to the female pheromone lure
- Females moths will ignore the trap
- If no male moths are caught in 9 days, move to another location.
- Check trap weekly, when full it is safe to discard in garbage.
- Pheromone Lure is effective for 90 days (check date) or until trap is full.
- Place additional traps until no moths have been seen for 6 weeks.
